Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Distinctions of prior art of LaTorre made were the following: (1) LaTorre is directed to nails, rather than skin; (2) LaTorre requires sufficient amount of water (see col. 4/5); (3) Must apply composition immediately in LaTorre, thus antimicrobial effects are not obtained (see column 5); (4) LaTorre's composition does not need to be gentle on the skin, since it is applied to nails. Examiner suggested the following: (1) to further define the composition/product; i.e., skin; (2) define components of bioactive glass; (3) incorporate amounts/ranges of bioactive glass. Applicant's response and/or amendment will be considered upon receipt. No specific agreement reached at this time.
